## New alternative to daily management services

BY SARAH TODD

Consultancy Creative Spa Concepts (CSC) has launched an educational solution to daily management services.

Called the Management Cultivation Program, it has been created to allow owners and operators to keep profits, maintain control and enjoy the benefits of operating a successful spa business.

The new programme educates the management team, so that owners don't relinquish control of management to an outside company. This way, owners and operators become part of the spa industry, while brand-building and controlling their finances.

CSC president and founder, Mindy Terry, said: "We aren't just 'giving a man a fish, we are teaching him to fish' through the new program. At CSC, we know that the best training is hands-on. We come to you instead of sending someone to a seminar." Details: [creativespaconcepts.com](http://creativespaconcepts.com)
